February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index In World War II, the U.S. Army not only supplied its soldiers with the most modern equipment and uniforms, suitable for any combat situation, but went as far as providing them with their favorite drinks or candy bars, and seemingly anything else they might require. This comprehensive reference book brings together all the equipment issued to American soldiers in the European Theater of Operations, 1943–45. Each item is presented with its catalog numbers, described in detail and fully depicted in photographs, including close-ups of the labels to aid identification of items. Graphics and diagrams offer additional information and context. This second volume of the G.I. Collector's Guide is fully revised with the addition of sections including personal equipment, trophies and souvenirs, the wartime draft and Stateside training, and the life of POWs in German camps. More than one thousand new artifacts with detailed captions are featured in this completely revised new work. Expert Henri-Paul Enjames describes all variations of uniform, insignia, badges, weapons, and equipment in detail. As a complete catalog with high-quality photographs, this book is invaluable to both family historians researching grandpa's kit found in the attic and to collectors in their quest to find authentic items among the reproductions that flood the modern market. Hard SF master and New York Times best-seller James P. Hogan's Giant's Star and Enterverse together for the first time in one volume! Realities Re-made! Earth is caught between a powerful alien empire and an off-shoot group of humans who hate Earth more than any alien ever could. Plus: two equal and opposite universes collide! Now demons stalk a world-controlling computer, while an even greater danger descends on Universe 2: cause is leading directly to effect. The horror! This title is sold without DRM (Digital Rights Management). "Readers who like their science hard will find this one a diamond." ¾Publishers Weekly on New York Times best-seller James P. Hogan's Mission to Minerva. This book contains 41 chapters of detailed repair description, 125 photographs, 60 technical illustrations, & a pattern pocket with 18 patterns. Limited edition of 2000 numbered copies. A review in the international magazine THE STRAD begins, "This is an impressive looking & important book for violin makers. Produced by two of the world's leading practitioners of the craft of violin restoration, it sets out to describe the techniques used in their workshops & to make these techniques available to the violin maker who lacks easy access to training in restoration workshops." The bulletin of the Violin Society of America states, "This long-awaited text presents the art & science of violin repair in a manner so clear in its concept & so unambiguous in its language that it is as enjoyable to read as it is informative. This book should rapidly become a vital reference work for violin makers everywhere." Published & distributed by the authors, 627 North Larchmont Blvd., Los Angeles, CA 90004. Includes all works deriving from DOE, other related government-sponsored information and foreign nonnuclear information. This bilingual edition presents the poetry of the greatest living Albanian poet. Visar Zhiti lived a life of great privation: locked away in dictator Enver Hoxha's prisons, he was not allowed pencil or paper. He wrote his poems in his mind and he and other prisoners committed them to memory. Only when Hoxha fell from power and the political prisoners were freed was Zhiti's magnificent poetry brought to print. Now English-speaking readers can share in the remarkably gentle and imaginatively rich poems produced from these years of suffering. Supplement 21: Concept-Based Indexing and Retrieval of Hypermedia Information to Using Self-Checkout Technology to Increase Productivity and Patron Service in the Library. In this study, a cylinder expansion test was performed using a square prism OFHC copper with a cylindrical extrusion filled with Comp B explosive charge. A Valyn VISAR was used as a measuring tool to record the expansion history of the cylinder by Doppler shift of the light reflected off its surface, which subsequently was used to obtain the velocity history of the square prism cylinder. Quadrature fringe signals obtained from the square prism cylinder test were analysed using the results still showing some traces of fringe jumps. Whereas the hands-on calculations were more precise in correcting the jumps. This introduced some shifts in the velocity results VISAR Push-Pull reduction software and hands-on calculations. The outcome of the two velocity graphs (reduction software and manual) did not correspond. This might be due to the software velocity which caused the variation in the two velocity results. Overall, both software and manual methods resulted in velocity values that were difficult to draw conclusions from. In an attempt to further understand the test results, the displacement curve were also reduced from the velocity graphs. Although the trend of the displacement graph obtained from the reduction software is comparable to the displacement graph published in literature for the same test, the magnitudes of the values are still difficult to explain. The cylinder design used in this study was tested for the first time and numerous challenges rose up during setup and execution and are discussed. It is important for another test to be conducted with an improved setup in order to achieve a reliable interpretation of the cylinder test results. A detailed account, based on fieldwork and interviews, of how Women, Peace and Security norms are militarized and put at the service of operational effectiveness. International organizations and governments want to increase women's participation in military operations and peacebuilding. Gender equality is increasingly seen as the antidote to conflict, a key factor in achieving stability. While feminist activism inspired the emergence of these norms on gender and conflict, they were institutionalized through the Women, Peace and Security (WPS) agenda, with the military at the forefront of those changes. In Deploying Feminism, Stéfanie von Hlatky tells the story of how the military has been delegated authority to advance gender equality as part of their activities, while simultaneously tackling increasingly complex threats. Drawing upon fieldwork and interviews, she illustrates how NATO, the world's foremost alliance, has even embedded these ideas in the planning and execution of its missions. For troops deployed on NATO missions, this often means seeking out women in their operating area to improve intelligence gathering activities. While this helps the mission, does it help women and conflict-affected communities? Because of the military's focus on operational effectiveness above all else, von Hlatky argues that there is a distortion of WPS norms, as gender equality concerns fade into the background. Looking at NATO's ongoing operations in Iraq, Kosovo, and the Baltics, Deploying Feminism details the process by which Women, Peace and Security norms are militarized and put at the service of operational effectiveness. Further, it shows why an adjustment is necessary for gender equality to become a true planning priority.
